

NETWORK ASSESSMENT AND DESIGN SERVICES

- When selling IP Video solutions, make sure your customer's network can handle the bandwidth, and avoid post-installation customer satisfaction issues
 - Identify opportunities for additional hardware sales
 - Assessments can be performed remotely or on-site
 - Deliverables can include:
 - Existing topology review
 - Remote Metrics Testing and Report
 - QoS Consultation
 - Convergence Strategy Development
 - Equipment QoS Verification
 - Summary and Recommendations Document
 - Final Consultation and Test
-

WIFI SITE SURVEY AND VIRTUAL DESIGN SERVICES

- Ensure trouble free wireless implementations with detailed, professional, and affordable WIFI Virtual Designs and Site Surveys to help dealers and integrators accurately plan and deploy 802.11a/b/g/ WIFI networks.
 - **Virtual Design** Services define the desired coverage area, technical requirements, environmental factors and building characteristics of a successful WIFI deployment.
 - **Site Surveys** identify the factors that impact the performance, reliability and success of a WIFI LAN deployment.
 - Deliverables can include:
 - AP type and location recommendations
 - Antenna Recommendations
 - AirWise Report
 - Antenna signal patterns
 - Noise and Signal to Noise Ratio Findings
 - Channel Interference
 - Wired LAN Integration Report
 - Map, Tower, Cabling and Mount Report
 - A **Spectrum Survey** is a separate service that identifies devices that cause WIFI interference. The report details a list of interfering devices, as well as maps displaying the location of the spectrum device. A Spectrum Survey can be conducted at the same time as the On-site Survey.
-

OUTDOOR POINT-TO-POINT SURVEY

- Confirm line-of-sight access and frequencies
 - Report includes signal strength, noise and channel interference
 - Recommendations for equipment (AP, antenna, location, channels).
 - Maps displaying signal strength, noise, signal-to-noise ratio and channel interference are included.
-
