

Close More Profitable Business with LEAF Flexible Funding Products.

A technology solution can take months to pull together and install – tying up cash and your ScanSource credit line. Now when your customers lease through LEAF Financial, you can order equipment without large cash outlays or burdening existing lines of credit. When you utilize LEAF's Flexible Funding Products you'll conserve working capital, improve cash flow, and keep your credit lines open for other business needs.

3 funding programs to meet your needs

1 Increase your Purchasing Power

Through the **LEAF Lease Line of Credit Program** you can now order products through ScanSource without tying up your ScanSource credit line. When your customer leases through LEAF, we place the order on the LEAF Lease Line of Credit – you still receive the same volume benefits you are accustomed to from ScanSource.

2 Improve Cashflow

With the **Integrated Progress Payment Program**, LEAF Financial combines the LEAF Lease Line of Credit with a Progress Payment to pay you up to 50% of your profit margin and service charges upfront, while at the same time freeing up your ScanSource credit line. The remaining 50% is paid to you upon Delivery and Acceptance of the solution by your customer.

3 Faster Revenue Recognition

With the **Pre-Installation Funding Program**, LEAF Financial combines the LEAF Lease Line of Credit with Pre-Funding to pay you 100% of your profit margin and services upfront, and at the same time frees up your ScanSource credit line. You can then take up to 90 days to complete the installation.
