

The analog to IP technology shift

Analog cameras have long dominated the video surveillance market. Now IP technology advancements have caused a shift away from all-inclusive analog solutions. To maximize the efficiency and quality of their surveillance, many customers recognize the need to transition their analog installation to digital to gain advantages in image quality, remote accessibilities and improved scalability.

Fully-integrated IP solutions open up many new opportunities including:

- Ability to add high-resolution, megapixel cameras for superior image quality and improved evidence
- On-the-go remote access to video for faster response times
- Seamless control of external systems such as alarms, building systems and points-of-sale
- Flexible scalability and the ability to upgrade IP cameras one at a time
- Sharing a common video management software (VMS) platform to perform camera controls, video search and input/output commands
- Optimizing video storage on redundant servers or in separate locations to increase reliability and safeguard evidence
- Creating more intelligent surveillance with the integration of video analytics and alarm handling
- Faster and simplified set up with installation wizards built into VMS and the removal of cabling

Transition to IP your way

The benefits of IP are obvious, but the path to digital may seem complicated and costly. With Milestone Husky, there are multiple ways to effortlessly and cost-efficiently move from a closed system to a fully integrated IP system. Leading the industry forward is the state-of-the-art Milestone Husky Hybrid Network Video Recorders (NVRs).

Milestone Husky™ Hybrid Series

Mix analog and IP cameras with a premium solution that keeps you on budget

Instantly gain the IP advantage

Milestone Husky NVRs are the low-risk and flexible way to transition to IP and immediately enjoy the benefits. Each NVR in the Milestone Husky Series is compatible with more than 200 external encoders, the tools needed to convert analog video into a digital stream.

Milestone Husky Hybrid NVRs make the transition to IP more affordable since they are conveniently preinstalled with encoders for analog cameras and include channels for IP devices. Customers can reuse their existing analog cameras and can add IP cameras over time reducing up-front costs.

What makes the Milestone Husky Hybrid NVRs different?

- **Lower Licensing Costs:** Milestone encoder licensing means only one hardware device is needed for each analog encoder, regardless of the number of analog cameras connected to the encoder*, helping you transition to IP faster with less up-front costs.
- **Cost-efficient:** The Milestone Husky Hybrid is a premium, yet budget-friendly solution that allows for a mix of analog and IP cameras and come with encoders preinstalled.
- **Simplifies Analog to IP Transition:** Existing analog cameras can still be used while upgrading to IP
- **Future-proof:** Add-on licensing is available so IP cameras can be added to any Milestone Husky Hybrid base configuration. Plus, with all Milestone products, you can mix equipment from multiple vendors and build your installation with the most affordable equipment now and upgrade equipment and technologies as future needs change.
- **Completely Customizable:** With over 50 different customizable options such as processing power, storage and memory, each Milestone Husky Hybrid NVR is customized to meet your specific demands.
- **Scalable:** Use one Milestone Husky Hybrid NVR as a standalone or connect multiple ones using Milestone Interconnect to meet your growing business surveillance needs.
- **Optimized Performance:** Each state-of-the-art Milestone Husky Hybrid NVR is preinstalled with Milestone's award-winning VMS and preconfigured to ensure optimal performance.
- **Simplified installation:** With preinstalled VMS and automatic camera detection, the set-up is effortless and live and recorded video can be viewed within minutes, even from smartphones and tablets.

Choose the Milestone Husky Hybrid NVR that is right for you

Milestone Husky M30 Hybrid

Workstation NVR designed for comprehensive surveillance

- Integrated encoder
- 16 channels + 4 IP devices
- 4TB storage / 8GB RAM / i5 processor

Milestone Husky M50 Hybrid

Premier rack-mounted solution with unlimited options for advance installations

- Integrated Encoder Solution
- 32 analog channels + 16 IP devices
- 16 TB storage / 16 GB RAM / i7 processor

About Milestone Systems

Founded in 1998, Milestone Systems is a global industry leader in open platform IP video management software (VMS) and produces XProtect® VMS, the Milestone Arcus™ platform and the Milestone Husky™ series of network video recorders. Milestone delivers powerful surveillance that is easy to manage, reliable and proven in surveillance installations around the world. With support for the widest choice in network hardware and integration with other systems, Milestone offers best-in-class solutions to video enable organizations – managing risks, protecting people and assets, optimizing processes and minimizing costs. Milestone products are sold through authorized and certified partners. For more information, visit www.milestonesys.com.
